

**September 23, 2026**

**Addendum No. 04**

**File Reference Number: RFP 2026 070**

**Title: Fabrication of Flooring Panel Kits**

**RE: Clarifications/Questions**

---

**QUESTIONS/CLARIFICATIONS:**

**Item 1:** Do we need to seal the interior of the machined holes surface (ex: drawing 38593 – 39x machined hole surface of 0,88” dia, 0,12” deep)

**Answer:** Yes. The interior surfaces of all machined holes must be sealed in accordance with the applicable drawing requirements. Machined holes are considered machined surfaces and must therefore be sealed.

**Item 2:** Can we use our current approved sealer (toxicity, smoke density E-162/662) instead of the PPG Amercoat 370 pearl grey?

**Answer:** No. Substitutions for the specified epoxy sealant will not be accepted under this RFP. Proponents must use PPG Amercoat 370 Pearl Grey as specified in the applicable drawings. The specified product forms part of the approved material system, including the required plywood and applied sealant combination.

This Addendum hereby forms part of the RFP.
